

Welcome to the Meraki Node-RED API Training Course

Through the training course, you will create your own Node-RED flows or play around the provided flows in each lesson. In case you don't have an available Meraki organization, we are offering an API key with the read-only privilege to the Meraki Launchpad 🚀 demo organization. So you can have your flows interact with this real environment.

API Key: **40ab3b2bc53f0b17768bd1d5e1d401c8d803b588**

Please DON'T use this API key for other purposes. The Cisco Meraki team will rotate this key from time to time in case of any misuse.
